

# Knowing Your Vehicle Weights

Use the below chart to record your vehicle weights

## YOUR MAXIMUM VEHICLE WEIGHTS

Commonly, the maximum axle weights and gross vehicle mass can be found in the owners manual of your vehicle. If you are unable to find the details, you will need to contact the vehicle manufacturer. Record the details below.

FRONT AXLE	REAR AXLE	GROSS VEHICLE MASS (GVM)

## YOUR WEIGHTS

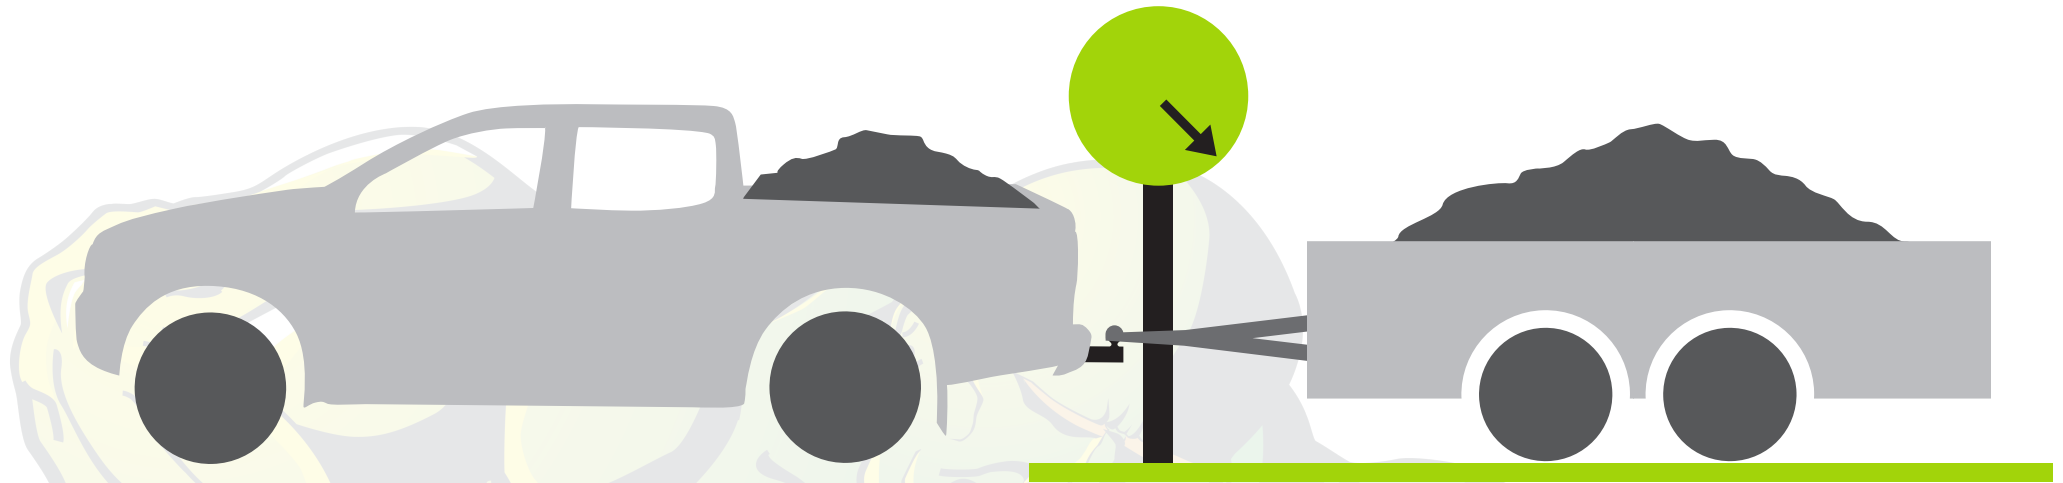

Record the weights of your vehicle below and compare to the maximum weights of your vehicle.

FRONT AXLE	REAR AXLE	GROSS VEHICLE MASS (GVM)

Tip: If you add your two axle weights, you will have your gross vehicle mass.

# Knowing Your Trailer Weights

Use the below chart to record your towing and trailer weights

## YOUR MAXIMUM TOWING WEIGHTS

Your vehicle and towbar will each have a maximum towing rating and ball weight, record the smallest weight of the two.

Most trailers, camper trailers and caravans over 750kg have a compliance plate attached to the trailer chassis or in the front boot, this will provide you with the maximum gross trailer mass and aggregate trailer mass.

BALL WEIGHT	TOWING WEIGHT	GROSS TRAILER MASS (GTM)	AGGREGATE TRAILER MASS (ATM)

## YOUR WEIGHTS

Record the weights of your trailer, camper trailer or caravan below and compare to the maximum ratings of above. Your gross trailer mass should not exceed your towing capacity.

BALL WEIGHT	GROSS TRAILER MASS (GTM)	AGGREGATE TRAILER MASS (ATM)
